Sunburst Software Solutions, Inc. Launches Updated Version of Certified Payroll Solution to Share Data with QuickBooks® 2005 Products

Certified Payroll Solution's Integration with QuickBooks Helps Growing Businesses Save Time and Money!

West Charleston, VT - November 15, 2004: Sunburst Software Solutions, Inc. today announced that Certified Payroll Solution (CPS) will now share data with Intuit's QuickBooks® software products - including Pro/Premier Editions 2005 and Enterprise Solutions 5.0. This exchange of critical data from time sheets, payroll transactions, and employee and job records in QuickBooks with CPS allows contractors too quickly and efficiently generate Federal and/or State mandated Certified Payroll Reports, Statements of Compliance, EEOC/Work Utilization Reports and Union or Third Party Benefit Reports on plain paper. This process will help growing businesses who use both products to manage their business more efficiently - saving them valuable time, money, and resources.

"Certified Payroll Solution (CPS) is a perfect fit for growing businesses that want to combine the ease-of-use of QuickBooks with effective Federal or State Prevailing Wage reporting protocols," says Nancy Smyth, President of Sunburst Software Solutions, Inc. "We recognize that growing business owners juggle many daily tasks and that they are constantly looking for ways to streamline their operations. Enabling the exchange of data between Certified Payroll Solution and QuickBooks will help growing businesses save time, meet compliance mandates, and manage their resources more efficiently - allowing them to spend more time actually running their businesses."

Certified Payroll Solution, now in it's fifth year, is an affordable program that allows users to easily create, organize and retrieve their project payroll information from QuickBooks and generate it; without risk of transposition errors and tedious double entry into mandated Federal and/or State required reporting formats, and is currently being used by General Contractors as Sub-Contractors in a wide variety of industry specific situations.

"The Intuit Developer Network strives to help the best and brightest developers solve the business management challenges small business owners face every day," said Ed Schaffer, business leader of the Intuit Developer Network. "We are pleased to be able to work with innovators like Sunburst Software Solutions to offer small business specialized applications that will work with the QuickBooks Financial Management Software Products. The data integration with Certified Payroll Solution and the QuickBooks products is an example of how increased efficiencies in managing financial data can give business owners more time to oversee other parts of their business."
