

Committed to Providing Contractors Using QuickBooks® with Certified Payroll, AIA Billing, Payroll Wage & Overtime Management Solutions!

Sunburst Software Solutions, Inc. provides fully integrated, time-saving solutions for Certified Payroll Reporting, AIA Billing, and Payroll Wage and Overtime Management for contractors using QuickBooks®. Our products leverage 75+ years of QuickBooks, bookkeeping, accounting, software development, and construction experience to provide contractors with real-world solutions, which have a proven track record of customer satisfaction, to help them work smarter.....not harder.

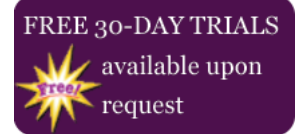

Certified Payroll Solution works together with QuickBooks to provide a complete solution for both Union and Non-Union Contractors working on Federal, State, or ARRA (stimulus money) funded projects. **QuickBooks®** provides the backbone of the information regarding Employees, Customers, Jobs, Time tracking, and Payroll information; it can, also, track fringe benefit contributions. **Certified Payroll Solution** holds additional information about employees, jobs, payroll wage items, and deductions that QuickBooks does not, via "linked records". Information from both programs is then merged together to generate the final reports.

Features:

- Choose Federal and/or State specific reports by job
- Multiple Federal, State, and Local EEOC/Workforce Utilization/ Manning Reports
- Monthly ARRA (American Recovery and Reinvestment Act) Reports
- Includes standard generic Bona-fide Plan Benefit Reports
- Create user-defined Union/Bona-fide Plan Benefit Reports
- Easily handles bi-weekly payroll
- Handles multiple Work Classifications and pay rates for individual employees; per job
- Electronically file certified payroll reports with LCPTracker, TRS Consultants, Elation Systems, Sandia National Laboratories and Alaska Department of Labor
- Includes **Wage Manager**, which allows you to work with multiple employees, payroll wage items, and pay rates, all at the same time

Benefits:

- Save time on contract compliance - generate all your reports in a single session
- Create accurate, timely, legible reports that meet Federal, State and Local requirements
- Eliminate transposition errors caused by manual data entry
- Stop entering the same data twice
- Designed specifically for QuickBooks users
- Reads existing QuickBooks data to create reports
- Certified Payroll Solution has provided a fully integrated, time-saving solution for QuickBooks user's since October 2000

Construction Application for Payment Solution works together with QuickBooks to provide a complete solution. **QuickBooks®** holds the backbone of the information regarding your Customers, Jobs, Estimates (Schedule of Values), and Progress Invoices (Work Completed this Period and Current Accounts Receivable); it can, also, track Retainage Payable and/or Receivable. **Construction Application for Payment Solution** holds additional project information, retainage methods, percentage of completion calculations, and accounting for stored materials that QuickBooks does not, via "linked records". Information from both programs is then merged together to generate the final billings and/or Contract Documents.

Features:

- Prints on AIA original G-702/G-703 and G-702/G-703 CMA documents
- Prints similar AIA type documents on plain paper
- Print plain paper versions of the HUD 51001, 51002 & 51003 Forms
- Automatically calculates Fixed or Variable Retainage
- Create Retainage Requisitions
- Easily handles Sales Tax distribution
- Includes **Contract Document Manager**; complete with 30+ standard contract documents
- Easily create additional Contract Documents

Benefits:

- Save time on contract billing by utilizing existing data
- Create accurate, timely, legible billings
- Eliminate transposition errors caused by manual data entry
- Stop entering the same data twice
- Designed specifically for QuickBooks users
- Reads existing QuickBooks data to create billings
- Construction Application for Payment Solution has provided a fully integrated, time-saving solution for QuickBooks user's since January 2002

Wage Manager Solution works together with QuickBooks® and/or **Certified Payroll Solution** to help automate the time consuming task of editing individual employee records in order to change their wage rates. Use this program when it's time for a company wide pay increase, when there is a need to add new payroll wage items with either a common or employee specific rate of pay, when you need to remove obsolete payroll items, or at those times when you are faced with the need to start a brand new QuickBooks® company data file.

Features:

- Work with single or multiple payroll wage item types - i.e. only Hourly Regular Rates, Commissions, Salary items, or any combination of the above
- Modify pay rates for existing payroll items for multiple employees, all at the same time
- Add a new payroll item - creating rates for straight time, overtime, double time, and triple time, all at the same time, and assign that new payroll item to multiple employees
- Remove obsolete payroll items from multiple employee records with 2 clicks of your mouse
- Increase or decrease existing rates of pay by a specific dollar amount, a percent, or set the rate to be a fixed rate of pay
- Allows for shift differentials and cash benefit rates
- Print reports for review prior to writing this information back to QuickBooks®
- View a visible log file as this information is written back to the QuickBooks® file
- Work with multiple QuickBooks® files under a single license

Benefits:

- Save time through automation
- Modify, add, or remove multiple payroll wage items for multiple employees, all at once
- Eliminate transposition errors
- Stop wasting valuable time updating pay rates in individual employee records
- Streamline employee wage modification process
- Designed specifically for QuickBooks users
- Ensure employees are paid the correct rate for the task they perform
- Wage Manager Solution has provided a fully integrated, time-saving solution for QuickBooks® user's since February 2005

Crew/Overtime Entry Solution works together with QuickBooks® and/or **Certified Payroll Solution** to help automate the time consuming task of manually calculating employee overtime or "weighted-average" overtime hours by providing a solution to nine (9) critical and/or missing needs for your QuickBooks employee timecard entry process.

Features:

- Teach the program about the Overtime/weighted-average overtime Laws your state requires you to follow
- Create "crews or groups" of employees
- Employees can be assigned to the same "crew or group" multiple times with different rates of pay OR assign the same employee to multiple crews
- Enter time by crew - by job - by day; using ALL straight time hours and pay rates and post this back to your QuickBooks Weekly Timesheet
- Enter timecards for hundreds of employees with a few clicks of your mouse
- Stop manually calculating and entering Overtime and/or Double time hours worked by each employee
- Create a company wide Holiday schedule and have Crew/Overtime Entry Solution automatically enter paid holidays
- "Weighted-Average" overtime can be automatically calculated by choosing one of four different calculation methods AND added to each employee's timesheet at the end of the week
- Eliminate the need to manually update employee rates of pay by setting "defaults" in Crew/Overtime Entry Solution

Benefits:

- Save time on employee timecard data entry through automation
- Eliminate transposition errors caused by manual overtime calculations
- Easily comply with complex Overtime and/or "weighted-average overtime laws
- Choose from one of four different calculations for "weighted-average" overtime compliance
- Know your employees are being paid correctly
- Avoid costly payroll errors
- Crew/Overtime Entry Solution has provided a fully integrated, time-saving solution for QuickBooks users since August 2008

Our products and QuickBooks® Financial Software work together to help simplify your business management. QuickBooks Premier Contractor Edition helps you gain increased control over your contracting business so you can spend more time on the job and less time on paperwork.
